Job Match Summary

Great! 5 skills match the job requirements, increasing your chances of getting through the ATS.

SQL Power BI Excel Data Mining Data Analysis

Data Mining Job Match 89%

Data Analysis Job Match 88%

Suggestions

- + ****Add a Targeted "Summary/Objective" Section:**** Immediately introduce yourself as a prospective "Data Analyst" and highlight your proficiency in "SQL," "Python," "Excel," "Power BI," "data models," and "data mining" to align with the job description's core requirements.
- + ****Explicitly Address "Statistical Packages":**** While you list Python (Pandas, NumPy) and Excel, rephrase a relevant bullet point (e.g., in your Accenture experience) or include in your summary that you are proficient in "statistical packages" to directly match the JD's phrasing.
- ✓ ****Reframe Experience for Data Focus:**** For your "Full Stack Web Development Intern" role, emphasize the data-related aspects like "data models," "data consistency," "data pipelines," and "analytics use cases." For your "Associate Software Engineer Intern" role, explicitly connect "Excel data processing" and "Python scripts" to "data wrangling" and "statistical packages."
- ✓ ****Prioritize and Emphasize Data Projects:**** Ensure your "IPL Player Performance Analytics" and "EcoScore" projects are presented prominently and their descriptions explicitly use terms like "data analysis," "data modeling," and "visualization tools" to showcase direct relevance.
- ✓ ****Highlight Key Skills:**** In your "TECHNICAL SKILLS" section, ensure "SQL," "Excel," and "Power BI" are easily scannable and potentially bolded or listed at the top of their respective categories to immediately catch the eye of both ATS and human reviewers.

ATS Optimization Analysis for Data Analyst Role

1. Identify keywords from the job description that should be included in the resume.

Based on the job description, the following keywords are critical:

- * **Role/Domain:** Data Analyst, data models, data mining
- **Technical Skills:** SQL, statistical packages, Excel, SAS, SPSS, visualization tools, Tableau, Power BI
- **Education:** BS in Mathematics, Economics, Computer Science, or Statistics (or equivalent)

2. Suggest reformatting or restructuring to improve ATS readability.

Analysis Summary: The resume content is well-aligned with the job description, but the formatting is not optimized for ATS. The following suggestions are provided to improve readability and keyword matching:
